DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: On pages 7 and 8, each occurrence of “Velcro” should be capitalized in its entirety. Correction is required.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 9 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The use of the trademark “Velcro” in claims 9 and 12 is indefinite it is suggested that it be amended to generic terminology such as -- hook and loop material--.

Allowable Subject Matter

4. Claims 9 and 12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

5. Claims 1-8, 10-11 and 13-15 are allowable because the prior art does not teach or suggest the recitation therein including a forearm brace having proximal and distal shells that pivot while being in tension and a adjustable wrist mechanism is integrated with the device in combination with an adjustable palm grip that is integrated in the proximal shell while tensioned.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.
